About the Data

This publication provides a data source for Alberta's international trade, and is intended to provide businesses with information on current export markets.

A profile is included for each country that imported over $10 million worth of Alberta's goods in 2004. Each profile lists the top 15 commodities Alberta exported to that country and compares these to Canadian exports. A summary of export totals to all countries is included in Appendix B.

The trade good nomenclature used is the Harmonized Commodity Description and Coding System (Harmonized System or HS), adopted by Statistics Canada in 1988.

Exports by geographic region, industry, and commodity are also provided in the following sections. Industry Canada's regional groups are used. Industry groupings are based on Statistics Canada's concordance table between export commodity and industry classifications.

For the purposes of this publication, six-digit HS codes are presented in the country profile tables. For simplicity, some commodity descriptions accompanying these codes have been revised from their standard format. Readers requiring the exact content of a particular HS number are referred to the Customs Tariff Schedule of Canada.

Statistics Canada is the main source of information for the publication. Estimates for commercial and transportation service exports are developed by Alberta Economic Development and are based on special surveys conducted by Statistics Canada. The informational captions appearing at the top right corner of each country profile are from *World Factbook 2005*. The term GDP at PPP in the captions refers to Gross Domestic Product at Purchasing Power Parity, and "nes" in the country profiles refers to "not elsewhere specified."

The term "exports" refers to "domestic exports," goods grown, extracted or manufactured in Canada. The term includes goods of foreign origin, which have been materially transformed in Canada and then re-exported.

Unfortunately, service exports cannot be included on a country specific basis since these data are not presently available. However, these exports, including travel and tourism, have been provided in the "Year in Review" section. Throughout the remainder of this document, "exports" will refer strictly to merchandise exports.

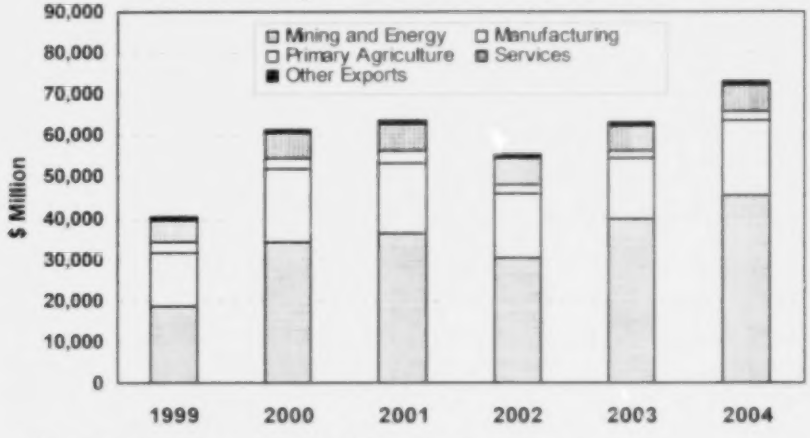
The Year in Review

Alberta's international exports rise 15.7% in 2004

Alberta exported $73.2 billion worth of goods and services to more than 180 countries in 2004, an increase of 15.7% from 2003's total of $63.3 billion. This total includes $66.4 billion in commodity exports and $6.8 billion in service exports. Canadian exports of goods and services increased 7.1% in 2004, after three consecutive years of declines.

Alberta Exports of Goods and Services

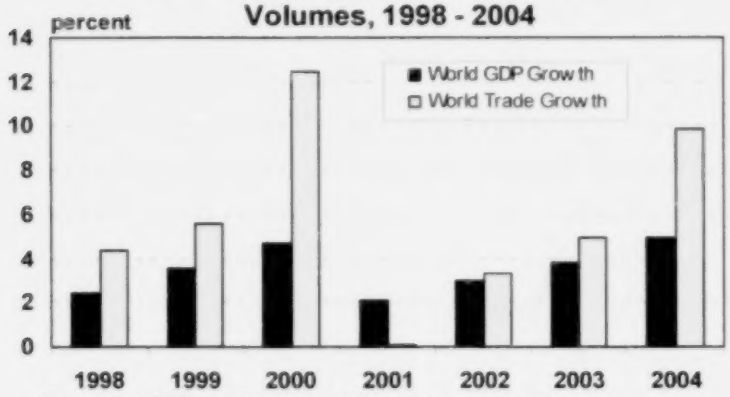


Sources: Statistics Canada and Alberta Economic Development

Goods Exports

The value of goods exports grew by 16.6% from $57.0 billion in 2003 to $66.4 billion in 2004. Of the 183 countries Alberta exported to, the top markets were the United States, China and Japan. The United States imported $59.0 billion worth of goods, China $1.7 billion and Japan $1.2 billion.

Growth in World GDP and World Trade Volumes, 1998 - 2004



Note: World GDP growth rates are based on exchange rates at Purchasing Power Parity.
Source: International Monetary Fund

The main cause of Alberta's large increase in exports was a booming world economy, which led to both higher commodity prices and higher volumes for Alberta exports. Prices rose sharply for crude oil, lumber and oriented strand board (because of the strong U.S. housing market), non-ferrous metal products (cobalt and nickel), and a number of chemicals. Large volume increases were

registered for beef (borders were re-opened to select cuts of beef), grains, pork, chemicals, oriented strand board, and oil and gas field equipment. It is estimated that higher volumes accounted for about one-half of the total export gains and for about two-third of the manufacturing sector's export growth.

The economies of all regions, with the exception of the European Union, expanded strongly in 2004. Economic growth accelerated in the U.S. and Asia, and Latin America rebounded from a three-year period of low or no growth. As a result, global economic growth reached a 28-year high in 2004, and world trade in goods and services turned in its best performance in four years. World trade volumes grew by almost 10% in 2004, higher than the 20-year average of 6.1%.

Alberta's major regional markets were North America, Asia and Europe. North America (mostly the U.S. and Mexico) accounted for 89.8% of total commodity exports, Asia for 6.4% and Europe for 1.8%. Exports to all regions were higher in 2004 than in 2003. Exports to North America increased by 15.7% to $59.6 billion, to Asia by 32.5% to $4.2 billion, to Europe by 14.1% to $1.2 billion, and to the Middle East and North Africa by 9.9% to $465 million. The region with the fastest growth was Central America: exports to that region rose 34.7% to $160 million.

Commodity exports can be classified into three sectors: mining and energy, primary agriculture, and manufacturing. The mining and energy sector accounted for the majority of exports at $45.6 billion, followed by the manufacturing sector at $18.2 billion and primary agriculture at $1.8 billion. In 2004, exports in the mining and energy sector increased by 15.0%, in the manufacturing sector by 22.0%, and in primary agriculture by 9.0%.

Service Exports

Service exports were estimated at $6.8 billion in 2004, 7.8% higher than in 2003. Included in this figure are $1.5 billion in international travel and tourism receipts, $2.7 billion in exports of transportation services and $2.6 billion in commercial services. Service exports, especially tourism, rebounded after a poor performance in 2003, that was caused by the events of September 11, SARS, uncertainty about the war in Iraq and the possibility of further terrorist attacks.

Unlike commodity exports, services cannot be included on a country specific basis. Therefore, unless otherwise specified, the term "export" in the remainder of this publication will refer strictly to commodities.

Market Influences

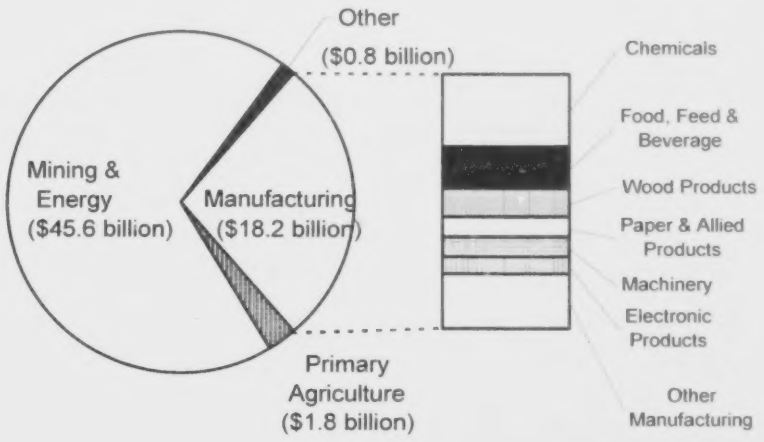
Some of the factors that influenced Alberta's 2004 trade include:

- high growth in the world economy and in world trade volumes,
- strong Canadian and EURO currencies,
- continued weakness in the value of the U.S. dollar,
- booming U.S. and Chinese economies,
- unexpectedly strong economic growth in Japan,
- a very strong economic recovery in Latin America,
- very strong North American housing markets,
- re-opening of international borders to select cuts of Canadian beef,
- high natural gas and crude oil prices, and
- a strong rebound for international tourism.

Alberta Exports by Industry

In 2004, the value of Alberta's goods exports reached a record $66.4 billion, an increase of 16.6% from 2003. Strong global demand, especially from the U.S. and China, resulted in large increases in both volumes and prices. Growth in exports of manufactured and agricultural goods was driven primarily by higher volumes, while higher crude oil prices, and to a lesser degree also higher oil and gas volumes, caused a sharp rise in energy and mining shipments.

Alberta exports rise sharply because of a strong world economy and high oil prices



Alberta's goods exports are divided into three main sectors: mining, manufacturing and primary agriculture. The mining sector accounted for $45.6 billion (69%) of Alberta's goods exports. This consisted primarily of natural gas and crude petroleum at $23.4 billion and $20.4 billion, respectively. Mining exports were 15% higher than in 2003, as a result of higher prices for crude oil and higher oil and gas volumes.

The manufacturing sector accounted for $18.2 billion in exports, an increase of 22% from 2003. A booming world economy and high growth in global trade volumes caused large increases in volumes and prices for many manufactured products. A partial reopening of international borders to most cuts of boneless Canadian beef, after the loss of export markets in 2003 as a result of the detection of BSE, also contributed to this sector's strong showing. Higher volumes were responsible for two-third of manufacturing's export growth and higher prices for one-third. Exports of *primary metals* (mainly nickel and cobalt) grew by 49%, of *wood products* by 42%, of *chemicals* by 34% and of *food, feed and beverages* by 29%. Exports of *computer and electronic products* fell for a fourth consecutive year.

Primary agricultural exports totaled $1.8 billion in 2004, a rise of 9.0% from 2003. Exports of crops jumped 25%, but livestock exports plummeted 59% as a result of border closures caused by Bovine Spongiform Encephalopathy (BSE). Exports of most grains and oilseeds, especially wheat and barley, were up strongly. No live cattle were exported in 2004, compared with $196 million in the first five months of 2003, while hog exports rose 35% on higher volumes.

Alberta Exports by Industry - 1999 to 2004

	($millions)						Percent Change 2003/04	Percent Change 1999/2004

2. Estimate

Agriculture, Food and Beverages

Partial border re-openings cause large rise in agricultural exports

The combined export value of primary agriculture and food and beverages (agri-foods) was $4.8 billion in 2004, an increase of 21% from 2003's $4.0 billion and largely the result of the re-openings of most borders to select cuts of Canadian beef. Although the ban on live cattle remained in effect in 2004, primary agricultural exports rose 9.0% to $1.8 billion, while exports of food and beverages jumped 29% to $3.0 billion. The leading agri-food exports were beef products at $1.5 billion, wheat (including durum wheat) at $934 million, oil seeds at $375 million and pork products at $368 million.

Beef exports rose 40% to $1.5 billion on higher volumes, especially to the U.S. and Mexico (even though prices continued to drop). Pork exports jumped 42% to $368 million because of increased volumes to the U.S. and Japan. A large rise in export volumes of canola oil, cake and meal to the U.S. and especially China caused exports of vegetable fats and oils to rise by one-quarter to $329 million. Frozen food shipments (mainly potato products) increased by 36% because of higher volumes shipped to the U.S. and Japan.

Higher export volumes also caused a 27% rise in the value of wheat exports (including durum wheat) to $934 million. Wheat exports to China surged from $13 million in 2003 to $185 million in 2004, and exports to Indonesia, the U.S. and South Korea were also sharply higher. Oil seed shipments rose by 8.8% to $375 million: Mexico and the U.S. increased their import volumes of Alberta canola. No live cattle were exported to the U.S. in 2004 because of BSE, while $196 million was exported in 2003 and $635 million in 2002.

Alberta's Major Agricultural Exports
(including Food & Beverage Manufacturing)

	2003 ($ '000)	2004 ($ '000)	Percent Change
Beef products	1,094,506	1,536,914	40.4%
Wheat, including durum wheat	737,024	933,598	26.7%
Oil seeds (canola, mustard seed, flaxseed)	344,510	374,851	8.8%
Pork products	259,551	368,285	41.9%
Vegetable fats & oils (e.g. canola oil & cake)	262,344	328,653	25.3%
Frozen foods (potatoes)	196,448	267,430	36.1%
Other grains (barley, oats)	76,631	136,753	78.5%
Malt & flour milling	136,463	134,601	-1.4%
Raw hides & skins	129,832	132,376	2.0%
Forage products (hay, alfalfa)	73,582	97,163	32.0%
Swine, live	54,296	72,708	33.9%
Peas & beans	56,941	63,123	10.9%
Cattle, live (includes bison)	196,351	0	-100.0%
Total Above	**3,618,479**	**4,446,455**	**22.9%**
TOTAL AGRICULTURE, FOOD & BEVERAGES	**3,987,004**	**4,813,394**	**20.7%**

About 46% of agri-food exports went to the United States ($2.2 billion), mostly in the form of beef products ($1.2 million), canola oil-cake and meal ($149 million), frozen potato products ($136 million) and pork ($105 million). Other major agri-food markets were Japan (canola and pork), Mexico (canola and beef) and China (grains) at $711 million, $484 million and $320 million, respectively.

Mining

Mineral fuel exports up sharply because of higher oil prices

Mining exports in 2004 were valued at $45.6 billion compared to $39.6 billion the year before. Major factors behind this 15% increase were a $4.5 billion jump in the value of crude oil, as both prices and volumes were substantially higher in 2004 than in 2003, and a $1.2 billion rise in natural gas exports, mostly because of higher volumes.

The 28% increase in the value of oil exports occurred because of an 18% rise in prices, combined with an 8% increase in volumes shipped. Natural gas increased by 5.6%, as a result of a 3.9% rise in volumes and a 1.6% rise in prices. Although volumes declined by 4%, liquefied petroleum gas exports rose 7.2% because of higher prices. More than 99% of these products were exported to the U.S.

Sulphur exports were up 35% in 2004, as both higher prices and volumes increased. China regained its position as Alberta's largest sulphur market, as its imports more than doubled to $123 million. Other large markets were the U.S. ($39.0 million), Brazil ($32.4 million) and Cuba ($24.0 million).

After declining sharply between 1999 and 2003, coal exports registered a 50% rise in 2004 that was caused entirely by higher volumes, especially to Japan and Mexico. The major coal market was the U.S. ($57.2 million), followed by Japan ($28.1 million) and Mexico ($26.3 million).

Alberta's Major Mining Exports

	2003 ($ '000)	2004 ($ '000)	Percent Change
Natural gas	22,147,515	23,393,033	5.6%
Crude petroleum	15,878,923	20,391,699	28.4%
Petroleum gases, liquefied:	1,318,402	1,412,920	7.2%
Propane, liquefied	*1,107,069*	*1,155,604*	*4.4%*
Butanes, liquefied	*158,474*	*219,096*	*38.3%*
Other, liquefied	*52,859*	*38,220*	*-27.7%*
Sulphur	189,887	256,028	34.8%
Coal	77,728	116,890	50.4%
Total Above	**39,612,455**	**45,570,570**	**15.0%**
TOTAL ALL MINING	**39,648,302**	**45,610,201**	**15.0%**

The majority of Alberta's mining exports went to the United States, consisting mostly of crude petroleum, natural gas and propane. More than 99% was imported by the U.S., while the rest was imported primarily by China, Brazil, Japan, Mexico and Cuba.

Manufacturing

Strong global economic growth translates into high growth in both volumes and prices of Alberta manufacturing exports

After declining by a total of 17% in the previous three years because of the manufacturing sector's global recession and the high tech meltdown, Alberta's manufacturing sector rebounded strongly in 2004 with exports growing by 22% to reach a record-high of $18.2 billion. Global economic growth reached a 28-year high in 2004, while global trade volumes rose nearly 10%. As a result, both volumes and prices rose strongly for Alberta's manufacturing exports. Manufacturing export volumes (rather than values) increased by an estimated 15%, partly as a result of higher exports of beef, oriented strand board (OSB), oil and gas field machinery and equipment, ethylene glycol, polyethylene and ethylene polymers. Prices rose sharply for most chemicals (such as ethylene glycol and polyethylene), primary metals (nickel and cobalt), and building products (lumber and OSB).

The manufacturing sector accounted for 27% of all commodity exports in 2004. Even with the declines of the previous three years, this sector's exports were still 41% higher in 2004 than they were in 1999 and nearly triple 1994's value.

Of the 15 industries that comprise this sector, ten increased their export values compared to 2003. The industries with the largest gains were *chemicals* (up 34%), *food, feed and beverages* (up 29%), *primary metals* (up 49%) and *wood products* (up 42%). Exports of *computer and electronic products*, mostly telecom equipment, declined a further 8.9% and have fallen by 71% since 2000.

The *chemical* industry remained Alberta's largest sub-sector with exports of $5.3 billion, followed by *food, feed and beverages* with $3.0 billion. The other sub-sectors with exports in excess of $1 billion were *wood products* ($2 billion), *paper products and wood pulp* and *machinery*, each with $1.4 billion, and *computer and electronic products* ($1.3 billion).

Alberta's Manufacturing Exports by Industry

	2003 ($ millions)	2004 ($ millions)	Percent Change
Chemicals	3,983.0	5,344.4	34.2%
Computer & Electronic Products	1,439.3	1,311.4	-8.9%
Electrical Equipment, Appl. & Comp.	208.8	280.4	34.3%
Fabricated Metal Products	368.6	428.3	16.2%
Food, Feed, Beverages	2,345.0	3,024.3	29.0%

Paper Products & Wood Pulp	1,380.7	1,442.0	4.4%
Plastics & Rubber Products	237.5	227.3	-4.3%
Primary Metal Products	669.3	996.0	48.8%
Refined Petroleum & Coal Products	671.0	730.5	8.9%
Transportation Equipment	390.3	427.0	9.4%
Wood Products	1,405.4	2,000.5	42.3%
Other Manufacturing	150.8	146.8	-2.7%
TOTAL MANUFACTURING	**14,919.9**	**18,200.2**	**22.0%**

Exports were higher for all major commodity groups, except wired telephone equipment. Exports for this sub-sector fell by 36% between 2003 and 2004, and have plummeted by 87% during the past four years, as a result of the worldwide high tech meltdown, which especially affected manufacturers of telecom equipment.

The top manufacturing exports in 2004, with exports of at least $1 billion each, were synthetic resins (such as polyethylene), beef, organic chemicals, wood pulp and engineered wood products (such as OSB). Collectively, these accounted for just over 40% of all manufacturing exports.

The manufactured commodities with the strongest growth in 2004 compared to the previous year were:

- fresh or chilled boneless beef (up $523 million, or 59%)
- ethylene glycol (up $464 million, or 72%)
- ethylene polymers (up $380 million, or 44%)
- polyethylene (up $240 million, or 38%)
- oriented strand board (up $369 million, or 65%)
- lumber (up $155 million, or 27%)
- nickel (up $132 million, or 34%)
- cobalt (up $131 million, or 124%)

About 80% of the boneless beef was exported to the U.S., while Mexico accounted for nearly 20%. China accounted for more than 70% of the ethylene glycol exports (used in the clothing and textiles industry), followed by South Korea at 10%. The U.S. accounted for the lion's share of ethylene polymers, polyethylene, OSB and lumber. Three-quarter of nickel exports went to the European Union, and half of the cobalt to Japan and one-quarter to the Netherlands. Exports of light oils (e.g. diesel fuel), pork, prepared potatoes, parts for transmission equipment, turbo propellers, and propylene and butadiene also increased sharply.

A total of $12.6 billion of manufactured commodities was imported by the U.S. in 2004, an increase of $2 billion or 19% from 2003, because of higher volumes of resins, OSB, beef, petro-chemicals, fertilizers, light oils and parts for transmission equipment, and to a lesser degree higher prices for lumber, light oils, OSB and petro-chemicals. Export values for the *chemicals*, *wood products* and *food, feed and beverage* sectors rose sharply. Although the sharp drop in the U.S. dollar likely caused export values to drop in three sectors, *computers and electronic products*, *plastics and rubber* and *furniture and related products*, high commodity prices more than offset its impact in most other sectors. The top three manufacturing sectors for Alberta - U.S. export trade in 2004 were: *chemicals* ($3.9 billion), *food, feed and beverages* and *wood products* ($1.9 billion each).

Asia contains Alberta's number two, three and five markets for manufactured goods, China ($1.3 billion), Japan ($845 million) and South Korea ($387 million), with significant export volumes also going to Taiwan ($183 million), Hong Kong ($111 million) and Singapore ($108 million). Manufacturing exports to China jumped 66%, as shipments of ethylene glycol nearly rose 77% to $928 million. Exports to Japan increased by 26%, because of higher cobalt and pork exports. South Korean imports of manufactured goods from Alberta rose 6.7%, also because of strong growth in ethylene glycol imports. Lower imports of telecom equipment led to a 36% decrease for Taiwan, while Singapore's imports rose 43% (nickel and cobalt) and Hong Kong's 5.2% (ethylene glycol and beef). Overall, *chemicals*, *food, feed and beverages* and *paper and wood pulp* were Alberta's top manufacturing export sectors to Asia.

Alberta's largest European Union markets for manufactured goods were Belgium ($205 million), the Netherlands ($203 million), the United Kingdom ($182 million), Italy ($79 million), and France ($79 million). For Belgium, the U.K. and the Netherlands the largest manufacturing import was nickel, for Italy durum wheat and for Germany wood pulp.

Mexico's manufacturing imports from Alberta jumped by 79% to $470 million, primarily as a result of the re-opening of the Mexican border to selected cuts of beef. Smaller markets with significantly higher imports of manufactured goods include Australia (ethylene polymers and pork), the United Arab Emirates, Kazakhstan, Venezuela and India (oil and gas field equipment), Libya (refrigerating equipment), Saudi Arabia and Israel (telecom equipment), Switzerland (turbopropellers) and Indonesia (wood pulp).

Forestry, including Wood, Paper and Allied Products

Forest product exports jump because of booming U.S. economy

Overall forestry product exports totaled $3.5 billion in 2004, a jump of 24% from 2003. This large increase was mainly the result of the booming U.S. housing market, which led to increased volumes and prices for most of Alberta's wood building products. U.S. housing starts rose by just over 5% in 2004. However, wood pulp, the sector's largest export, increased weakly by 2.9% as a result of a slight drop in prices caused by the strong Canadian dollar. The value of lumber shipments rose 27% as prices rose sharply because of the strong demand in the U.S. OSB exports increased sharply by 65%, because of record high OSB prices and strong volume growth.

Alberta's Major Forestry Exports
(includes Wood, Paper and Allied Products)

	2003 ($ '000)	2004 ($ '000)	Percent Change
Wood pulp	1,196,981	1,231,209	2.9%
Oriented strand board & waferboard	571,559	940,661	64.6%
Lumber	580,337	735,826	26.8%
Newsprint	114,471	131,022	14.5%
Prefabricated buildings (mostly of wood)	50,364	72,542	44.0%
Fibreboard	38,665	55,928	44.6%
Plywood	37,063	41,966	13.2%
Builders' joinery and carpentry	36,882	41,841	13.4%
Total Above	**2,626,322**	**3,250,995**	**23.8%**
TOTAL ALL FORESTRY	**2,793,064**	**3,451,345**	**23.6%**

The primary markets for wood pulp were the United States ($510 million), China ($177 million), Japan ($171 million) and South Korea ($165 million). Wood pulp exports to the U.S., China and Japan rose 12%, 21% and 3%, respectively, while South Korean imports fell 8%. The U.S. is by far the largest market for OSB, accounting for more than 99% of the total.

The value of lumber exports increased by 27% in 2004. This was the result of a 29% jump in lumber exports to the U.S., which accounts for 89% of Alberta lumber exports. Japan increased lumber imports by 13% to $74 million.

Major markets for forestry products were the United States ($2.6 billion), Japan ($249 million), China ($181 million) and South Korea ($167 million).

Chemicals

Very high world economic growth causes exports of chemical sector to surge

The value of chemical exports rose 34% to $5.3 billion, as both prices and volumes grew because of robust international demand, especially in the U.S. and China. Overall volumes were 18% higher, mostly as a result of high growth in the demand for resins (such as polyethylene) in the U.S. and China's surging imports of ethylene glycol. Export volumes rose especially strongly for polyethylene and other ethylene polymers, ethylene glycol, urea and diethylene glycol. Most major commodities also had higher prices – the largest price increases were registered by styrene, acyclic hydrocarbons and diethylene glycol – although the high Canadian dollar did have a moderating effect on the overall price increases.

Ethylene polymers (other than polyethylene and ethylene vinyl acetate) remained Alberta's largest chemical export with a value of $1.2 million, a 44% increase from 2003, as a result of strong growth in both volumes and prices. The commodity's major market was the U.S. which accounted for $1.0 billion (also up 44% from the previous year) or 84% of ethylene polymer exports. Polymer exports to China rose 64% to $91 million.

Exports of ethylene glycol increased by 72% to $1.1 billion, because of a sharp rise in volumes to the largest two markets: China and South Korea. Prices were also higher. Exports of ethylene glycol to China, Alberta's largest market for this commodity, more than doubled to $792 million, as a result of strong demand growth in China's textiles and clothing industries.

Polyethylene exports, most of which were destined for the U.S., advanced 38% to $874 million, because of higher volumes. Exports of styrene increased by 6.5% in 2004 to $451 million because of higher prices. The U.S. was the sole market for Alberta styrene.

Alberta's Major Chemicals Exports

	2003 ($ '000)	2004 ($ '000)	Percent Change
Polymers of ethylene, nes	854,449	1,234,366	44.5%
Ethylene glycol	644,490	1,108,848	72.1%
Polyethylene	633,538	873,582	37.9%
Styrene	423,799	451,459	6.5%
Urea	222,152	278,423	25.3%
Anhydrous ammonia	199,379	248,060	24.4%
Acyclic hydrocarbons, saturated	184,061	194,958	5.9%
Methanol	107,968	124,629	15.4%
Ethylene-vinyl acetate copolymers	115,573	115,272	-0.3%
Diethylene glycol	43,465	91,719	111.0%
Acyclic hydrocarbons, unsaturated	23,290	70,892	204.4%
Ammonium nitrate	57,097	56,747	-0.6%
Total Above	**3,509,261**	**4,848,955**	**38.2%**
TOTAL ALL CHEMICALS	**3,982,970**	**5,344,429**	**34.2%**

Major markets for chemicals were the United States ($3.9 billion), China ($928 million), South Korea ($135 million), Mexico ($72 million) and Hong Kong ($50 million).

Machinery

Machinery exports rise because of strong global energy sector

In 2004, machinery exports increased by 15% to $1.4 billion as a result of a boom in the global energy sector, caused by high oil and gas prices. Exports to the U.S., which account for more than half of Alberta machinery exports, rose 16% to $819 million, partly because of higher sales of pumps and of other machines and appliances with individual functions (mostly oil and gas field wire line and downhole equipment). Exports to the Middle East rose by more than 40%, because of higher demand in the United Arab Emirates (UAE), Libya and Kuwait. Exports to China, Kazakhstan, U.K. and Venezuela also rose strongly.

Exports of oil and gas field machinery, mainly boring and sinking machinery and parts thereof, rose 6% to $317 million, as a result of higher demand in the UAE, Russia, Algeria and Kuwait. Shipments to the U.S., which account for almost one-half of this sector's exports, remained virtually unchanged from 2003.

Exports of other industrial machinery, much of which is used by the oil and gas sector, jumped 25% to $272 million, because of very large increases in China, Kazakhstan, Iran and Australia. Exports to the U.S. rose 12% to $110 million.

Due to a 55% jump in demand from the U.S. to $198 million, exports of pumps and compressors, mainly energy related, increased by 26% to $264 million.

The United States accounted for 58% of machinery exports. Other major markets include Russia, the UAE, China, Libya, Australia, Kazakhstan, U.K. and Yemen (each importing more than $20 million).

Alberta's Major Machinery Exports

	2003 ($ '000)	2004 ($ '000)	Percent Change
Oil and gas field machinery	299,099	317,186	6.0%
Parts for boring or sinking machinery	*166,358*	*184,063*	*10.6%*

Computer and Electronic Products

Although the global high tech industry emerged from its three-year long slump last year, Alberta's exports by the computer and electronic products industry, dominated by telecom equipment, continued to decline. The industry's exports fell by 8.9% in 2004 to $1.3 billion, significantly lower than the $2.1 billion in 2002 and $4.5 billion in 2000.

Slump continues for Alberta's high tech industry

Exports of telephone apparatus fell by 36% to $497 million, because U.S. demand fell by one-third, and exports to Taiwan and Hong Kong dropped sharply. Wireless communication equipment exports rose 26% to $340 million because of large increases for the U.S. and Israel. Exports of measuring and controlling instruments (e.g. surveying instruments and gas or smoke analysis apparatus) were 24% higher at $307 million due to large increases for China, Singapore, Sudan, Russia and Saudi Arabia.

The United States accounted for $912 million or 70% of Alberta's computer and electronic product exports. Other major destinations include China ($52 million), Singapore ($33 million), the U.K. ($29 million) and Mexico ($23 million).

Alberta's Major Computer & Electronic Product Exports

	2003 ($ '000)	2004 ($ '000)	Percent Change

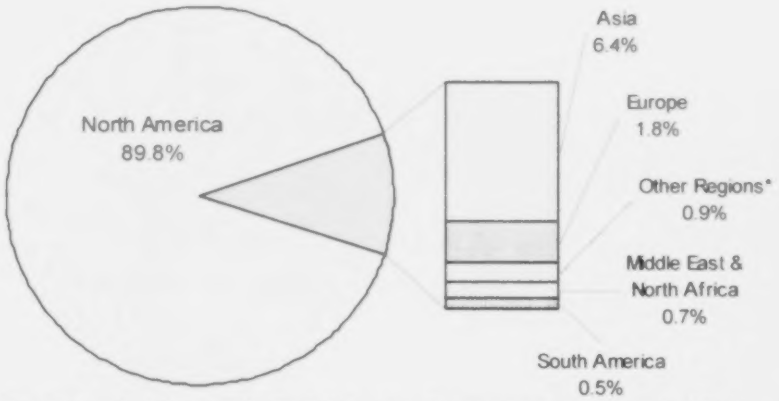
Alberta Exports by Region

Export growth was broad based with all of Alberta's export regions seeing strong gains in 2004

North America is Alberta's largest export market, accounting for $59.6 billion or 89.8% of total shipments in 2004. Excluding oil and gas commodities that are primarily destined to the U.S., North America made up two-thirds of Alberta's exports. Asia is Alberta's second largest regional market, capturing 6.4% of Alberta total exports, followed by Europe (1.8%) and the Middle East and North Africa (0.7%).



*Other Regions include Oceania, Central America, Commonwealth of Independent States, and Sub-Saharan Africa

Alberta merchandise exports to all nine export regions registered strong gains. Exports to North America increased by 16% due to larger shipments of crude oil, beef, ethylene polymers, lumber, polyethylene and OSB. Exports to regions outside North America climbed by 25%, due in large part to sharp increases in ethylene glycol, wheat, boneless beef, nickel and cobalt deliveries.

Alberta's Exports by Region

	2003 ($'000)	% of Total	2004 ($'000)	% of Total	% Change 2003/2004
North America	51,532,833	90.4	59,609,447	89.8	15.7
Asia	3,188,007	5.6	4,224,244	6.4	32.5
Europe	1,071,659	1.9	1,222,928	1.8	14.1
Middle East & North Africa	401,728	0.7	435,632	0.7	8.4
South America	297,058	0.5	333,146	0.5	12.1
Oceania	140,296	0.2	164,287	0.2	17.1
Central America	118,879	0.2	160,122	0.2	34.7
Commonwealth of Independent States	126,872	0.2	141,331	0.2	11.4
Sub-Saharan Africa	105,843	0.2	123,296	0.2	16.5
TOTAL	**56,983,174**	**100.0**	**66,414,434**	**100.0**	**16.6**

Asian imports of Alberta goods rose sharply by 33% because of higher ethylene glycol, wheat, cobalt and sulphur deliveries. At the same time, China overtook Japan to become Alberta's second largest trading partner.

In 2004, exports grew for 20 of Alberta's 25 largest export markets (countries). Large increases were noted for China (+83%), Mexico (+73%), Chile (+71%), the Netherlands (+67%) and Venezuela (+66%).

NORTH AMERICA

Exports to North America grow strongly - led by the energy and manufacturing sectors

North America (excluding the rest of Canada) is Alberta's single largest trading region and accounts for 89.8% or $59.6 billion of Alberta's total exports. In 2004, Alberta exports to North America rose 15.7%.

The U.S. accounts for approximately 99% of the North American export market, with the remaining 1% virtually all going to Mexico.

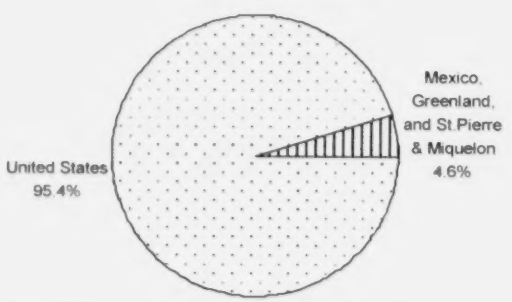
Alberta's Exports to North America

	2000 ($'000)	2001 ($'000)	2002 ($'000)	2003 ($'000)	2004 ($'000)
United States	48,770,265	50,668,427	43,005,273	51,151,638	58,951,193
Mexico	352,627	477,178	447,345	379,693	657,600
Greenland	100	1,592	694	1,502	643
St. Pierre & Miquelon	60	131	-	-	12
TOTAL	**49,123,052**	**51,147,327**	**43,453,312**	**51,532,833**	**59,609,447**

Alberta's top exports to North America are oil and gas commodities, such as crude oil, natural gas, propane and butanes, which represented 74% of total exports to the region in 2004. Energy exports rose 15% to $45.2 billion. The manufacturing sector accounted for another 24% of Alberta – North America trade. Manufacturing exports grew by 20% to $10.9 billion. The largest manufacturing exports were polymers of ethylene, boneless beef, polyethylene, lumber and OSB.

Excluding oil and gas and commodities the value of Alberta's North American exports was worth $14.4 billion in 2004, with Mexico's share of Alberta exports rising to 4.6%.

Alberta's Exports to North Excluding Oil and Gas
Total: $14.4 Billion



Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids.

United States of America

U.S. bound manufacturing shipments significantly higher in 2004

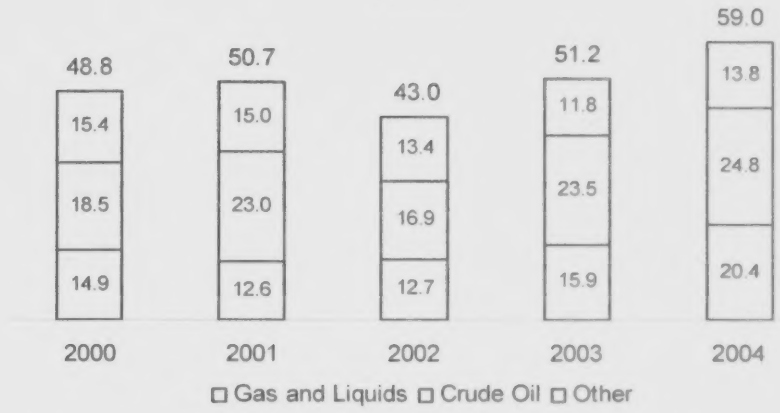
In 2004, the U.S. economy expanded by 4.4%, its highest growth rate since 1999. Strong consumer and business spending, as well as productivity gains fueled this growth. During the year, the U.S. imported a record $59 billion from Alberta, 15% more than in 2003.

Dominated by crude oil and especially natural gas, Alberta has seen the value of its exports to the U.S. grow by 21% over the last five years – one of the largest increases of all countries. In 2004, natural gas and especially crude oil registered sizable increases because of price and volume gains.

According to the American Gas Association, natural gas supplies nearly one-fourth of all of the energy used in the U.S. In 2004, $23.4 billion worth of natural gas flowed from Alberta to the U.S., up 5.6% from the previous year. This increase was a result of stronger prices (+1.4%) and elevated volumes (+4.6%). Alberta's second largest export to the U.S., crude oil, rose sharply by 29%. Global uncertainty and rising world demand pushed crude oil prices and volumes upward by 18% and 8.8%, respectively.

Alberta's Exports to the U.S.

$ Billions



Excluding oil and gas commodities, exports bound to the U.S. grew at a slightly faster rate than total exports, up 16% from 2003. Shipments of beef, ethylene polymers, polyethylene, lumber and OSB were significantly higher. Manufacturing exports jumped by 19%, mostly due to increased chemical, wood product, and food, feed and beverage deliveries.

In 2004, the following manufactured commodities registered the largest export gains, compared to 2003:

- Fresh and chilled boneless beef increased sharply by $359 million to $1.1 billion, as a result of higher volumes. A large part of this growth can be attributed to the substantially lower level of shipments in 2003, as a consequence of import restrictions on Canadian beef products.
- OSB jumped by $373 million to $937 million because of record price levels and elevated volumes.
- Polyethylene grew by $209 million to $801 million due to higher volumes.

- Polymers of ethylene climbed by $320 million to $1.0 billion because of higher prices and especially volumes
- Lumber (coniferous) rose by $146 million to $656 million, as a result of sharply higher prices.

The U.S. imported $112 million less light petroleum oil preparations in 2004 than they did in 2003. The technology sector experienced its fourth consecutive year of export declines, largely due to lower shipments of transmission apparatus (-$92 million), telephone switching apparatus (-$59 million) and telephone parts (-$21 million). There were no live cattle exports due to import restrictions.

Alberta's share of Canadian exports to the U.S. reached 18% in 2004, up from 17% in 2003, and up from 14% in 2002. This is the second largest provincial share, behind Ontario. In 2004, Alberta had the second largest increase in exports to the U.S. after Saskatchewan.

Top U.S. States

California and Texas account for 37% of Alberta's non-energy exports to the U.S.

Because energy exports, such as crude oil and natural gas, cannot be allocated to the state of final destination, they are not included in the following state export totals. The U.S. Midwest region and California are the major markets for Alberta oil and gas. For a breakdown of exports by state including energy commodities refer to Appendix D.

Alberta's Exports to the U.S. by State, Excluding Oil and Gas Commodities*

	2003 ($'000)	% of Total	2004 ($'000)	% of Total	% Change 2003/2004

* Excluded commodities include: Crude Oil, Natural Gas, Propane, Butane and other Natural Gas Liquids.

Excluding oil and gas commodities, California is Alberta's largest trading partner (apart from the U.S. as a whole). It is closely followed by China, Japan, Texas and Pennsylvania. In 2004, the top five U.S. markets were:

- **California** remained Alberta's top U.S. market with exports of $1.9 billion in 2004, up 30% from the previous year. OSB was Alberta's largest non-energy export to California, increasing from $199 million in 2003 to $330 million in 2004. The province's next largest exports were boneless beef, up 68% to $266 million, and styrene, more than doubling to $196 million. Strong growth was also recorded for acyclic hydrocarbons, canola oil-cake and meal, ethylene glycol and polyethylene.

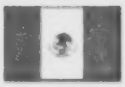
- **Texas** imported $1.3 billion worth of Alberta goods in 2004, down marginally from 2003 mainly because of a sharp decline in styrene imports. Ethylene polymers were the largest export to Texas at $151 million, 56% higher than in 2003. More than $200 million of oil and gas field equipment, a wide variety of products ranging from pumps to boring machinery, was shipped from Alberta to Texas in 2004. Other major exports to Texas include liquefied butadiene and propylene, boneless beef, polyethylene, prepared potatoes, acyclic hydrocarbons and lumber.

- Exports to **Pennsylvania** jumped by 52% to $1.0 billion in 2004. Chemical products represented about two-thirds of the non-energy commodities exported. Exports of polymers of ethylene more than doubled to $420 million, and butadiene and propylene shipments grew by $100 million. Other major export commodities include polyethylene, boneless beef, woodpulp and styrene.

- **Illinois** imports of Alberta goods were 25% higher, reaching $747 million in 2004. Deliveries of parts for office furniture, diethylene glycol, polyethylene and boneless beef were up substantially. Other large imports include styrene, wooden office furniture and lumber.

- **Washington** imports decreased by 1.7%, primarily as a result of lower live cattle and light petroleum preparations deliveries - the top two imports in 2003. OSB shipments were sharply higher by 87%, followed by refined light oils (primarily diesel fuel), urea, and anhydrous ammonia.

Mexico



Mexico's economy expanded strongly by 4.4% in 2004 following three consecutive years of little or no economic growth. This was its fastest growth rate since 2000. The Mexican economy is particularly dependent on the U.S., which buys 90% of its exports. The healthy expansion of the U.S. economy in 2004 translated into above average growth for Mexico.

"Since the implementation of the North America Free Trade Agreement in 1997, Mexican imports have tripled"

Lorena Patterson, Alberta Mexico Office

Alberta's exports to Mexico jumped by 73% to a record high of $658 million in 2004. This sharp rise was largely the result of boneless beef shipments nearly tripling when the border reopened to Canadian boneless beef products. In 2004, boneless beef deliveries were valued at $275 million, up from $93 million in 2003. Over 40% of Alberta's total exports to Mexico were beef and the majority of Canadian beef shipments come from Alberta.

Large export gains were also noted for canola, up by $44 million to $106 million, polyethylene (up $22 million), polymers of ethylene (up $9 million) and coal (up $26 million). Alberta's third largest export, wheat, fell by 4.5% to $45 million in 2004 and ethylene glycol exports decreased by 49% to $12 million.

Oil and gas field equipment shipments were down sharply and there were no malt deliveries in 2004. In 2003, these products had export values in excess of $10 million dollars each.

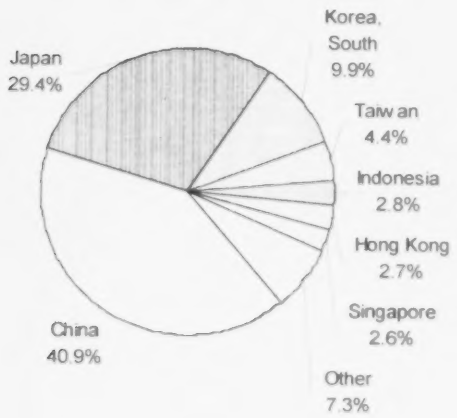
Mexico's share of Alberta's exports was 1.0% in 2004. Alberta accounted for 23% of Canada's exports to Mexico, up from 18% in 2003, second only to Ontario (35%).

ASIA

Ethylene glycol was the single largest factor in the remarkable rise in Asian imports

Asia registered strong economic growth of about 4.5% in 2004, up about a half of a percentage point from the year previously. Almost all of Asia's major economies grew strongly, led by China (+9.5%) and India (+6.9%). Although Japan had more moderate growth of 2.6%, it was its highest growth in eight years.

Alberta's Exports to Asia
Total: $4.2 Billion



Alberta exports to Asia rose sharply by 32% because of higher ethylene glycol, wheat, cobalt and sulphur deliveries. Ethylene glycol shipments to Asia experienced remarkable growth, increasing from $528 million in 2003 to over $1.0 billion in 2004. Asia accounted for 91% of Alberta's total ethylene glycol exports.

In 2004, China overtook Japan to become Alberta's second largest trading partner. Chinese imports jumped by 83% because of improved ethylene glycol, wheat and sulphur shipments. Japanese imports increased strongly by 21% due to higher cobalt and prepared potatoes. Strong export growth was also noted for Indonesia, Singapore, and the Philippines.

Alberta's Exports to Asia

	2000 ($'000)	2001 ($'000)	2002 ($'000)	2003 ($'000)	2004 ($'000)

Alberta saw its exports to Japan increase for the first time in five years, following a long period of economic stagnation in which its economy grew at just over one percent per year since 2000. On the other hand, the rapid growth in China, which has experienced economic growth of more than 8% a year over the past five years, has led to a sharp increase in demand for Alberta goods. Since 2000, Chinese imports of Alberta merchandise doubled. Over the same period, imports by Japan, South Korea, Hong Kong and Taiwan have decreased.

China

"China overtook Japan and became Alberta's second largest trading partner, exceeded only by the U.S."

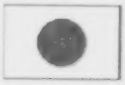
David Wong, Alberta China Office

China was one of the main drivers of global economic growth in 2004. Surging Chinese imports caused large increases in commodity prices (such as oil and steel) and in shipping rates. Chinese imports of resource based commodities such as grains, minerals, paper and wood products, and chemicals increased. The country is one of Alberta's fastest growing markets with export growth averaging about 25% per year since 1999.

In 2004, Chinese imports jumped sharply by 83% from 2003, to $1.7 billion. China bought $797 million worth of ethylene glycol in 2004, up from $374 million in 2003. Ethylene glycol is primarily used by China's textile and clothing industries and accounted for 46% of Alberta's export to China. Wheat was the next largest export, up from $13 million to $183 million; followed by woodpulp at $177 million, sulphur at $123 million, and polymers of ethylene at $91 million.

China's share of Alberta exports to Asia was 41% in 2004. Alberta accounted for 29% of Canada's exports to China.

Japan



"Japan is in its best economic condition since before the bubble burst in 1990"

Wes Sawatzky, Alberta Japan Office

Japan is the second largest economy in the world, behind the United States, and grew by 2.6% in 2004. However, weak internal demand, deflation and increased competition from rapidly developing Asian nations such as China, continue to trouble its economy. Japan is Alberta's third largest trading partner. Japanese imports of Alberta goods rose for the first time in five years, up 21% from 2003, and Alberta accounted for 15% of total Canadian exports to Japan.

Pork (fresh and frozen) was Alberta's largest shipment to Japan. Valued at $207 million in 2004, exports of this commodity rose by 17% from 2003. Canola exports fell by 3.2% to $172 million. Alberta's third largest export, wood pulp, increased by 3.0% to $171 million.

Cobalt shipments rose sharply by 167% to $120 million. Other major exports include forage products (such as alfalfa) at $86 million, lumber at $74 million, and wheat at $61 million. The Japanese government continues to ban beef and live cattle imports because of fears over BSE.

South Korea

"Korea's economic recession is over: retail sales and construction are booming in 2005"

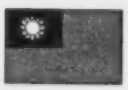
Don Smithson, Alberta South Korea Office

Exports to South Korea, Alberta's fourth largest market, grew by 12% with nine out Alberta's top ten export commodities registering gains. Ethylene glycol and wood pulp exports account for 70% of exports to South Korea. Shipments of wood pulp dropped by 8.3% in 2004 to $165 million, as a result of lower volumes and prices. Ethylene glycol deliveries increased by 40% to $128 million due to price and volume gains.

Gains were also registered for the next largest exports: nickel ($27 million), wheat ($20 million) and nickel power and flakes ($12 million). Due to import restrictions, there were no beef shipments to South Korea, a market that represented $37 million dollars in exports in 2002.

South Korea's share of Alberta exports to Asia was 10% in 2004, and Alberta accounted for 19% of Canadian exports to Korea.

Taiwan



"Capital goods and raw materials accounted for over 90% of Taiwan's total imports"

Li-an Chen, Alberta Taiwan Office

Taiwan's imports from Alberta in 2004 dropped by 36% to $186 million. This decrease resulted in Taiwan falling from being Alberta sixth largest international market in 2003 to ninth position in 2004. This drop was primarily the result of a steep decline in telecom equipment exports - traditionally Taiwan is a strong market for Alberta's telecom products. Taiwan's share of Alberta exports to Asia in 2004 was 4.4% (down from 9.1% in 2003) and Alberta accounted for 16% of Canadian exports to this country.

Taiwan, a major electronics producer, used to be a large importer of telecom equipment from Alberta. In 2004, however, Taiwan's imports of Alberta telecom equipment dropped by more than $85 million from 2003, to less than $10 million. Alberta's largest export, ethylene glycol, decreased by 11% to $29 million, followed by hides and skins falling by 44% to $25 million. Higher shipments were noted for nickel ($22 million) and cobalt ($13 million). At the same time, a small decrease was registered for wood pulp ($28 million) deliveries.

Hong Kong

"The surge in energy prices, and the scramble for oil have helped put up the Alberta profile in Hong Kong and China"

Joe So,
Alberta Hong Kong Office

As Alberta's sixth largest market in Asia, Hong Kong imported $115 million worth of Alberta goods in 2004, 5.7% more than in the previous year. Hong Kong accounted for 2.7% of Alberta's exports to Asia, and Alberta's share of Canadian exports to Hong Kong was 9.5%.

Like China, Hong Kong is a major importer of ethylene glycol from Alberta. Imports of ethylene glycol rose to $44 million from $12 million in 2003. The only other commodity to exceed $10 million in exports was hides and skins, which more than doubled to $31 million.

As was the case with Taiwan, Alberta exports of telecom equipment experienced a large decline in 2004. Computer and electronic products exports (mainly telecom equipment) dropped by 69% in 2004, to $14 million.

EUROPE

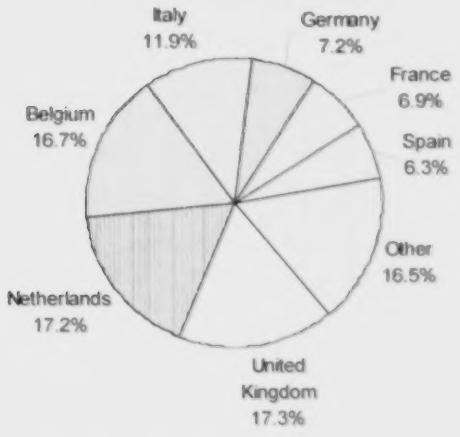
Alberta exports sharply higher despite lackluster European economic performance

The European economy started 2004 on a strong note, but lost its momentum in the second half of 2004 as economic growth cooled to 2.4% for the year as a whole. Despite this, the European growth was higher than the 1.0% expansion witnessed in 2003. The rising value of the Euro against the U.S. dollar led to higher imports, but its impact on exports was limited, as exports also rose strongly. However, domestic consumption remained sluggish, held back by the rise in energy prices and a more uncertain outlook for jobs.

Economic activity improved for most countries in the region. Gross domestic product growth among the four largest economies was a mixed bag, with Germany (+1.6%) and Italy (+1.0%) performing below the European average, while France (+2.1%), the United Kingdom (+3.1%) had stronger growth rates.

Alberta exports to Europe are fairly evenly distributed among the major markets. Alberta's largest markets in the region (the Netherlands, the U.K. and Belgium) each accounted for about 17% of the province's exports in 2004, followed by Italy (12%), Germany (7.2%) and France at (6.9%).

Alberta's Exports to Europe
Total: $1.2 Billion



European imports from Alberta increased by 14% to $1.2 billion, due to higher nickel, cobalt and turbo propeller shipments. The U.K. overtook Belgium to become Alberta's top market in Europe, with exports rising 14% to $212 million. Exports to the Netherlands grew by 67% to reach $210 million, and to Belgium by 8.5% to $205 million. Shipments to Italy and Germany dropped by 11% and 8.3%, respectively.

Since 2000, Alberta exports to Europe have climbed by 7.2%, with the value of shipments increasing the most in the Netherlands, Belgium, Spain and Switzerland. These gains were partially offset by lower exports to Italy, Germany and France – three of the top four economies in Europe.

United Kingdom

"The UK's economy will become more balanced with increased manufacturing output growth and a moderation of consumer spending"

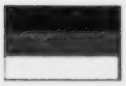
Chris Heseltine, Alberta UK Office

The U.K.'s economy recovered better than most Western European countries, following the economic slowdown seen during the 2001 - 2003 period. This economy is one of the strongest in Europe and has seen solid increases in employment and wage earnings. In 2004, GDP increased by a respectable 3.1%, the result of fairly strong growth in consumer and investment spending. In 2004, U.K. interest rates rose faster than European rates to curb inflationary pressures.

In 2004, Alberta exports to the UK climbed by 14% from, to $212 million. The U.K. accounted for 17% of Alberta's exports to Europe in 2004, and Alberta's share of Canadian exports was 3.0%.

Alberta's three largest commodity exports to the U.K. account for more than half of the total value of all shipments. Nickel exports fell by 3.1% to $67 million in 2004, accounting for nearly one-third of Alberta's total exports to the U.K. Medical devices increased by $12 million to $21 million, while wheat declined by 10% to $19 million

Germany



"Corporate restructuring and growing capital markets could allow Germany to meet the long-term challenges of European economic integration and globalization"

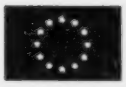
Reg Kontz, Alberta Germany Office

Germany is the largest economy in Europe, the fifth largest in the world and the world's largest exporter. However, it has become one of the slowest growing economies in the Europe. Following weak economic growth in the previous three years, Germany had its largest increase since 2000 at 1.6%, largely because of an unusually large number of working days in 2004. High unemployment and labour market rigidities, along with the modernization and integration of eastern Germany continue to hinder economic growth.

Alberta exported $88 million worth of goods to Germany in 2004, down 8.3% from the year before and 44% from 2000 levels. Alberta's largest export to Germany was wood pulp. In 2004, wood pulp shipments dropped by half to $23 million, and represented 26% of German imports from Alberta.

Germany accounted for 7.2% of Alberta's exports to Europe, and Alberta's share of Canadian exports was 3.7%. Year-over-year decreases in exports to Germany have been recorded since 1997.

European Union



On May 1, 2004, the European Union's (EU) 15 member states[1] were joined by ten new members[2]. The original 15 EU members account for nearly all (97%) of Alberta's export to the region. The expanded EU's imports from Alberta totaled $1.1 billion in 2004, up 15% from 2005.

Alberta's exports to the new member states grew strongly by 44%, to $33 million. Poland, the Czech Republic and Malta were the three largest export markets, accounting for almost two-third of the exports to the new members. The largest exports to the area were pet food and medical equipment.

Imports by the original 15 European countries mirrored the growth seen for Europe as a whole, because they account for 88% of its imports.

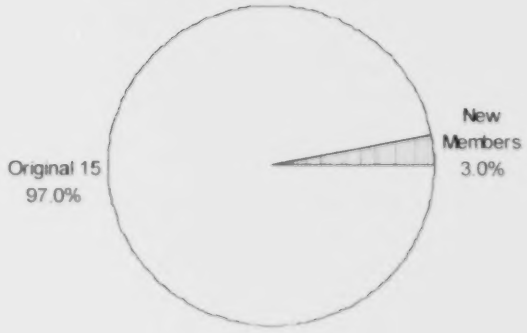
Total: $1.1 Billion



MIDDLE EAST & NORTH AFRICA

Oil and gas field equipment exports rise, along with crop exports

The Middle East and North Africa (MENA) is an economically diverse region that includes both the oil-rich economies in the Gulf and countries that are resource-scarce, such as Egypt, Morocco, and Yemen.

The MENA economy grew by 5.5% in 2004, comparable to the growth achieved in the previous year. The economies of oil exporting nations, such as Iran, the United Arab Emirates (UAE) and Saudi Arabia grew by about 5% because of high oil prices and increased production. This in turn led to increased public spending and capital investment.

MENA is Alberta's fourth largest trading region, but only represents 0.7% of Alberta's exports. In 2004, Alberta exports to MENA rebounded by 8.4% from 2003, to $436 million. This was the first increase in exports to the region in five years largely due to increased demand for oil and gas field equipment and machinery. Wheat, durum wheat, and barley were the next largest exports to the region.

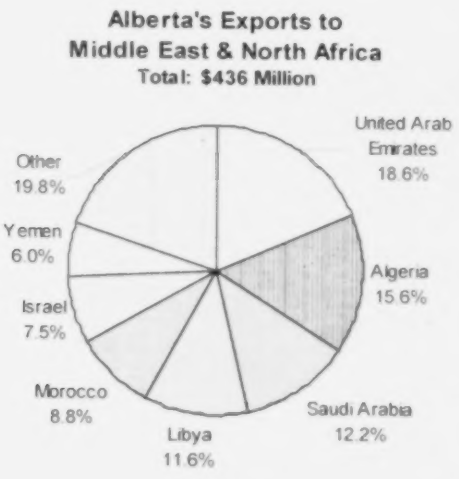
In 2004, the UAE became Alberta's largest MENA market with exports up 35% from 2003 to $81 million, because of increased sales of drilling equipment and wheat. Exports to Algeria fell by 29% to $68 million with large declines in durum wheat shipments. Saudi Arabia imports of Alberta commodities jumped by 49% as barley shipments increased from $17 million to $24 million and telecom equipment doubled to $10 million. Libya imported more durum wheat and refrigerating equipment, while Morocco bought more durum wheat.



SOUTH AMERICA

South America breaks out of a six-year cycle of little or no economic growth

The South American economy grew strongly by 6.2% in 2004, breaking a six-year trend of very weak or no economic growth. The recoveries in Argentina (+9.0%) and Venezuela (+18%) and a marked improvement in Brazil (+5.2%) accounted for much of the growth. The GDP of all countries in the region grew, with only two of the twelve nations registering economic growth of less than 3%.

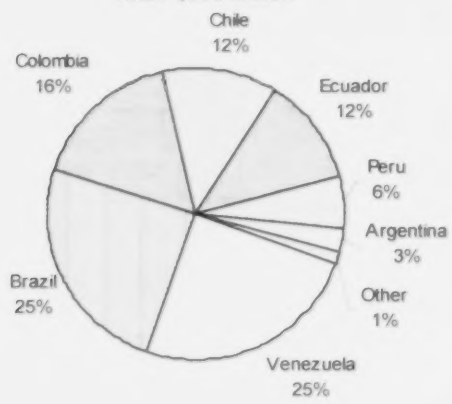
Imports by South America were $333 million in 2004. This represented 0.5% of Alberta exports and 13% of Canada's exports. South America imported 12% more from Alberta in 2004 than in 2003, with imports of wheat, malt, telecom parts and barley increasing. At the same time South America bought less sulphur and refined petroleum (jet and diesel fuel). Alberta's three largest exporting markets in South America were Venezuela, Brazil and Colombia.

Alberta's Exports to South America
Total: $333 Million



Since 2000, imports into South America have fallen by 37%. Three of Alberta's top four markets (Venezuela, Colombia and Chile) had exports in excess on $100 million in 2000. In 2004, however, there were no South American markets with imports above this level.

Imports by Venezuela, Colombia and Chile rose strongly in 2004, more than offsetting lower shipments to Brazil, Equator and Peru. Venezuela became Alberta's largest South American trading partner with exports up 66% to $83 million, principally due to strong growth in wheat, durum wheat, and oil and gas field machinery shipments. Exports to Brazil declined by 28%, largely the result of lower sulphur and gas liquefaction machinery. Colombia saw a large rise in wheat and barley imports.

OCEANIA

Oceania imports from Alberta reach eight-year high in 2004

Oceania consists of Australia, New Zealand and other South Pacific countries. In 2004, the region registered economic growth of 3.4%, as a result of strong growth in consumer spending, investment and exports to the rapidly developing economies of Asia (such as China). Oceania's imports from Alberta were up 17% from 2003, to $164 million – the highest level since 1997.

Australia and New Zealand dominate this region, capturing 96% of Oceania's imports from Alberta. Imports to Australia grew by 13% and to New Zealand by 35%. The remaining regions imported 14% more in 2004 than in 2003. Alberta has seen its shipments to Oceania trend upward since 2001.

Australia accounted for 77% of Alberta's exports to Oceania in 2004. Large export gains were noted for ethylene polymers, more than doubling to $24 million, followed by pork and chemical wood pulp. New Zealand's largest imports were ethylene polymers, turbo propellers and ammonium sulfate.

CENTRAL AMERICA

Cuba leads Central American import growth

Central America is located between the southern border of Mexico and the northwest border of Colombia, and includes the Caribbean island nations. GDP grew by about 3.4% in 2004, as a result of the recovery in the world economy.

Alberta exports to Central America increased by 35% in 2004 to $160 million, primarily as a result of higher shipments to Cuba, the Dominican Republic and Jamaica. The largest export commodities to Central America were sulphur, destined solely to Cuba, and wheat. Exports to Central America accounted for 0.2% of Alberta's exports, and 13% of Canada's exports to the area.

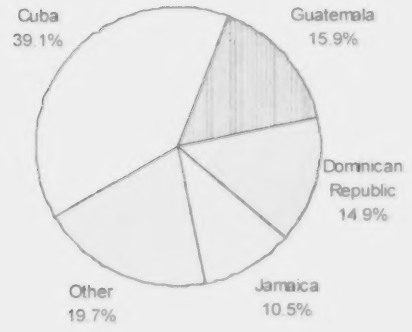
Alberta's largest Central American trade market is Cuba, representing 39% of the region's imports, followed by Guatemala, the Dominican Republic and Jamaica. The Caribbean island nations represented 73% of imports by the region, and Cuba accounted for 53% of this total.

Alberta's Exports to Central America
Total: $160 Million



COMMONWEALTH OF INDEPENDENT STATES

The Commonwealth of Independent States (CIS) consists of 12 of the 15 former Soviet Republics (the exceptions being Estonia, Latvia and Lithuania). The economies of this vast region expanded by approximately 8% in 2004. Russia, the largest economy in the CIS, grew by 7.1%.

Russia remains by far the largest export market in the CIS

Although the CIS has few supranational powers, it is more than a purely symbolic organization, possessing coordinating powers in the realms of trade, finance, lawmaking, and security.

In 2004, Alberta exports to the CIS region grew by 11% from 2003, to $141 million. Strong growth in oil and gas field equipment shipments resulted in exports to Russia rising by 4.2%, to Kazakhstan increasing from $16 million to $39 million, and to Turkmenistan from $199,000 to $16 million.

Alberta accounts for approximately 25% of Canadian CIS trade, but the region's share of Alberta exports was only 0.2%. Russia accounted for 54% of exports to the region, followed by Kazakhstan (27%) and Turkmenistan (11%).

SUB-SAHARAN AFRICA

Grain shipments fuel export growth to Sub-Saharan Africa

The Sub-Saharan Africa region entails the African countries that do not border the Mediterranean Sea. In 2004, the region's economy grew by about 4.0%.

Alberta's exports to Sub-Saharan Africa jumped by 17% to $123 million, the highest level of the past three years. Sub-Saharan Africa represented only 0.2% of Alberta's total exports. The largest exports to the region were wheat, accounting for approximately one-third of exports, followed by malt and automatic regulating or controlling equipment.

Exports to South Africa, Sudan and Nigeria accounted for 65% of the exports to the region. South African imports fell by 11% primarily due to lower sulphur and barley deliveries, but imports of malt more than doubled to $14 million. Sudan imported more wheat and automatic regulating and controlling equipment. Exports to Nigeria and Ghana rose by 56% and 48%, respectively, because of higher wheat shipments.

Alberta's Exports to Sub-Saharan Africa

Colorado	345,268	268,987	403,664	50.07%
Georgia	327,929	289,524	325,179	12.32%
Florida	314,834	280,790	310,467	10.57%
Massachusetts	330,346	374,027	274,580	-26.59%
North Carolina	146,431	144,583	254,488	76.02%
Idaho	225,433	193,478	223,174	15.35%
Kansas	247,528	174,364	217,632	24.81%
Kentucky	107,587	146,769	213,941	45.77%
Arkansas	36,507	72,431	211,164	191.54%
Vermont	214,499	205,224	199,026	-3.02%
Indiana	103,724	143,837	186,342	29.55%
Missouri	173,698	146,555	170,957	16.65%
Oklahoma	114,047	115,025	170,443	48.18%
Arizona	125,838	173,805	165,559	-4.74%
Utah	493,858	231,075	164,779	-28.69%
Louisiana	191,366	173,871	143,144	-17.67%
Nevada	80,337	83,249	130,113	56.29%
Nebraska	116,719	100,088	115,505	15.40%
Alaska	125,307	100,533	100,829	0.29%
South Carolina	94,785	75,188	96,495	28.34%
Alabama	77,029	65,535	83,974	28.14%
South Dakota	71,079	57,263	78,999	37.96%
Maine	71,694	68,101	62,319	-8.49%
Puerto Rico (U.S.)	16,762	4,554	59,579	1208.27%
Maryland	73,605	61,198	55,393	-9.49%
Mississippi	45,106	51,161	48,953	-4.31%
Connecticut	60,225	35,871	39,374	9.77%
New Hampshire	47,501	35,408	37,534	6.01%
New Mexico	23,134	25,828	34,387	33.14%
West Virginia	47,311	23,931	24,584	2.73%
Delaware	7,313	40,034	20,200	-49.54%
Rhode Island	6,356	13,716	8,602	-37.28%
Hawaii	17,302	7,853	4,866	-38.04%
District of Columbia	5,964	1,816	1,310	-27.90%
Virgin Islands (U.S.)	305	101	131	29.99%
Unknown State	583,168	552,155	568,511	6.37%
Totals	**43,005,273**	**51,151,638**	**58,951,193**	**15.38%**

** Exports to individual states can be seriously over or under-stated because energy exports, such as crude oil or natural gas, cannot be allocated to the state of final destination. For example, exports to Washington are overstated, while exports to California are understated.
